paint tool

*For all types  
of paint brushes*

# Clean and Go

**Brush cleaner and  
storage system**

**Makes brush cleaning quick and easy**

Saves time

Saves brushes

Saves the environment

# GO! Paint

Innovation in decoration

Clean and Go is the system to clean brushes quickly, easily and in an eco friendly way. Clean and Go consists of a metal kettle, a cleaning grid, a filter bag and the Connect and Go ring. With a layer of water or white spirit in the Clean and Go, the painter easily cleans his brushes in a very short time. For storage click the lid onto the ring.

## Brushes in perfect condition

- For all types of brushes: pure and synthetic bristle
- Thanks to the grid, brushes stay in optimum condition
- Helps to "break in" brushes contributing to a better paint finish

## Environmentally friendly

- No cleaning of paint brushes under a running the tap, when using water in Clean and Go
- All that is left after some months, is a bag of dried paint residue
- The metal kettle is 100% recyclable

## Cleaning method

- Fill Clean and Go with water or white spirit
- Place the brush gently onto the grid to remove
- Paint residue sinks to the bottom of the filter bag

## Refill

- Once residue is level with grid
- Remove the filter bag, allow residue to dry, and dispose the bag responsibly
- Refill Clean and Go with a new filter bag and grid

## Clean and Go: your all-in-one brush preserver

- Lid enables you to store your brushes perfectly for days or longer
- Ensure that the bristle is adequately covered
- Store Clean and Go system in an upright position

**Clean and Go cleans brushes quickly, economically and in an eco friendly way**
