

Clean your roller sleeves in about **30 seconds** and remove all waterbased wall paints effectively. It is a quick alternative for traditional roller cleaning methods and **reduces water usage**. Prevents unnecessary disposing of rollers.

Roller Cleaner

For quick and deep cleaning of roller sleeves

Deeply clean roller sleeves in about 30 seconds - saving you time!

Extend the life of paint rollers significantly - saving you money!

Use less water and dispose responsibly - saving the environment!

GO! PAINT Roller Cleaner

For quick and deep cleaning of roller sleeves

- Scrape off most paint from the roller straight back into the paint can or tray.
- Insert the roller into the Go!Paint Roller Cleaner.
- Lock the roller frame into the notch.
- Connect the hose to the snap-on connector.
- Turn on the water supply and clean the roller sleeve in about 30 seconds.
- Turn off the water supply and unlock the roller frame.
- Turn on the water supply briefly to force out the roller from the Go!Paint Roller Cleaner.

Please dispose of waste water responsibly

- Access to safe and clean drinking water is a scarce and precious privilege, avoid paint entering the watercourse.
- Either dispose as chemical waste or separate paint particles from water and recycle.

Disclaimer

- Some rollers are better cleaned than others, repeat cleaning procedure until satisfied.
- Some roller fabrics remain colored permanently, even after thorough cleaning in the roller cleaner.

Tip: To dry roller sleeves use a roller spinner.
